

# Tubing with Todd - Let's see if Todd can float the stream without getting dirty!

Crawdads live in most urban streams and look like little lobsters.

Start

Raked leaves clog the inlet, go back to start!

You stopped algae blooms from spreading, go forward 2 spaces!

Uh, use fertilizers sparingly to avoid the "Algae Monster!"

Oil/dirt from car washing at home went into drain, go back to rock 18!

Picked up dog waste, move to rock 14!

Storm washed chemicals into stream, go back 4 spaces!

Find Crawdad and move to the rock next to him!

Trash secured in covered bins, go forward 2 spaces!

Oil leaked into stream, go back 3 spaces!

Spin a crayon on the storm sewer lid to see how many spaces to move!

Finish - You cleaned the stream, Congratulations!

Learning Corner: The primary goal of a Stormwater Program is to reduce the amount of pollutants entering rivers, creeks and streams. Pollutants such as fertilizers, pesticides, sediments, hydrocarbons, trash and spilled chemicals may be transported by stormwater from developed areas into the storm sewer system ending up in our local waterways, causing water pollution.

**Instructions:** Tear the game pieces on the corners of this sheet. Spin a crayon on storm cover to see how many spaces to move.

**Objective:** To move throughout the game board and be the first to reach the finish line.

Don't forget to color as you go!
